

OBJECTIVE

The proposed project aims to fill the digital and numeracy gap by suggesting integrated approaches and providing a mix of skills for numeracy and digital literacy. IntoDIGITS suggests the empowerment of low skilled adults by developing 42 trainer's digital tools for the implementation of innovative workshops & activities that develop the numeracy and digital skills.

WHAT IS INTODIGITS?

IntoDIGITS is a European project funded by the ERASMUS+ programme of the European Commission. The project aims at empowering low skilled adults through different digital online tools that help trainers implement workshops in numeracy and digital competences.

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

HOW TO USE THE ONLINE INTERACTIVE PLATFORM?

The Online Interactive Platform has two types of assessments:

- Numeracy assessment
- Digital Assessment

WHAT IS IT ABOUT?

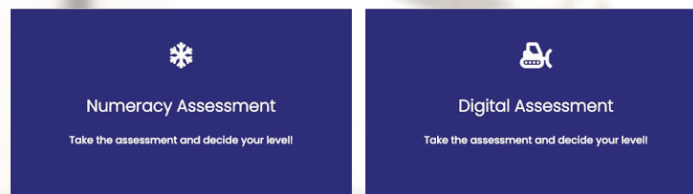

Through the Online Assessment, participants take a brief test to see what level they have of numeracy and digital competences. Based on results, the training knows which workshops he should implement afterwards

MAIN RESULTS OF INTODIGITS

- Development of 2 Qualification Frameworks (QF) for the Numeracy and Digital Competence tailored for the specific target group in a specific context.
- Elaboration of an Active Citizenship Scale (ASC) with the aim of matching the social and economic situation of low skilled adults with their digital and numeracy needs.
- Elaboration of 42 online digital tools for trainers incorporated in a new online tool (IntoDIGITS).
- Develop a digital assessment tool that will match the workshops needed by the trainers with the situation of the adults in the Active Citizenship Scale.

HOW DOES IT WORK?

Both the Numeracy Assessment and the Digital Assessment are made up of 25 questions, there is no time limit for completing them and you can accumulate a maximum of 250 points

TYPES OF QUESTIONS

The questions assess different knowledge and skills in the digital and numeracy fields, such as percentages, fractions, equations, geometry, units of measurement, etc. In addition, they are divided into 5 levels, in which a maximum of 50 points can be obtained.

RESULTS AND THEIR INTERPRETATION

At the end of the assessment, the tool provides an overall score both as a percentage and in the form of **total points** obtained

The main goal is to test participants' numeracy and digital knowledge and skills so that you can know the level at which they are at, as well as their strengths and weaknesses

PROJECT OUTCOMES:

- 2 Qualification Frameworks (QF) for the Numeracy and Digital Competence
- Elaboration of an Active Citizenship Scale (ASC).
- 42 online digital tools for low skilled adult's trainers.
- Digital training assessment tool matched with the Active Citizenship Scale
